Work Experience

Full stack software developer

Sep 2021 - Mar 2022

Remote, Ukemey Inc. | Ottawa

- Participated in peer code reviews in an agile environment. Received and provided feedback to ensure we met accessibility WCAG and user requirements.
- Created Schemas with mongoose for MongoDB collections and used queries from both mongoose and MongoDB with nodejs.
- Gained solid understanding of nodejs event loop.
- Improved performance of web-application API calls by over 50% using Redis caching.
- Made web applications with Typescript, React and created documentation for custom components.
- Worked with Firebase, React Native and Figma to design and build dual platform mobile application.
- Used Selenium & python to web-scrape over 60, 000 lines of data for REST API development.
- Developed customer-facing visualization dashboard for client expected to manage over 2, 000 users for rewards program.
- Used SEO and analytical technologies like Clixtell, Google Analytics and Google tag manager to observe, differentiate between user/bot behaviour and avoid advertising overcharge on web applications.
