Work Experience

Full stack software developer
Remote, Ukemey Inc.

Sep 2021 - Jan 2024

- Participated in peer code reviews in an agile environment. Received and provided feedback to ensure we followed accessibility (WCAG) and software development best practices.
- Worked with Azure cloud infrastructure alternatives like AWS : Route 53, Cloudfront & S3 for object storage and static site delivery. Learned about solutions and popular architecture models for scalability.
- Heavy experience with DevOps tools like GitLab, Slack, AWS and Selenium.
- Created Schemas with mongoose for mongoDB collections and used queries from both mongoose and mongoDB with nodejs. Gained solid understanding of nodejs event loop and data storage.
- Built web applications with Typescript, React.js and created documentation for reusable custom components.
- Dual platform IOS & Android mobile development and design with Figma, Firebase and React Native
- Used Selenium & python to web-scrape over 60, 000 lines of data for REST API development.
- Developed custom visualization dashboard for client expected to manage over 2, 000 users for rewards program.
- Worked with Selenium and Jest for webscraping and to troubleshoot production issues.
- Used SEO and analytical technologies like Clixtell, Google Analytics and Google tag manager to observe, differentiate between user/bot behaviour and avoid advertising overcharge on web applications.

Mobile & Web Developer
Decor and Vibes Inc.

Jan 2022 - Apr 2022

Used React Native to link QR scanner app for events & seating arrangements.

Projects
